# Chapter 1

## Namespace Index

### 1.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

<a href="#">AppAdvisory</a> . . . . .	7
<a href="#">AppAdvisory.SpringPong</a> . . . . .	7

## Chapter 2

# Hierarchical Index

### 2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

MonoBehaviour	
AppAdvisory.SpringPong.DotBase . . . . .	10
AppAdvisory.SpringPong.Dot . . . . .	9
AppAdvisory.SpringPong.Player . . . . .	18
AppAdvisory.SpringPong.GameManager . . . . .	11
AppAdvisory.SpringPong.InputTouch . . . . .	18
AppAdvisory.SpringPong.Utils . . . . .	19

## Chapter 3

# Class Index

### 3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">AppAdvisory.SpringPong.Dot</a>	
Attached to the 4 big dots in the game. We just change the name of the dots by convenience. And get a reference to the <a href="#">GameManager</a> . . . . .	9
<a href="#">AppAdvisory.SpringPong.DotBase</a>	
<a href="#">Player</a> (= "ball who bounce") and "big dots" (the 2 dots on the top and the 2 dots on the bottom) inherit from this class. We handle seom references and intialize sprites. . . . .	10
<a href="#">AppAdvisory.SpringPong.GameManager</a>	
In Charge to all the game management (game over, point, restart etc..) and in charge to show interstitial in the game. For monetizing this game with ads, everythign is already coded for you. You just need to get VERY SIMPLE ADS here: <a href="http://u3d.as/oWD">http://u3d.as/oWD</a> . . . . .	11
<a href="#">AppAdvisory.SpringPong.InputTouch</a>	
In Charge of the inputs in the game. . . . .	18
<a href="#">AppAdvisory.SpringPong.Player</a>	
Class in charge of the player. Attached to the <a href="#">Player</a> GameObject (child of <a href="#">GameManager</a> ). . .	18
<a href="#">AppAdvisory.SpringPong.Utils</a>	
Utility class. . . . .	19

## Chapter 4

# Namespace Documentation

### 4.1 AppAdvisory Namespace Reference

#### Namespaces

- namespace [SpringPong](#)

### 4.2 AppAdvisory.SpringPong Namespace Reference

#### Classes

- class [Dot](#)  
*Attached to the 4 big dots in the game. We just change the name of the dots by convenience. And get a reference to the [GameManager](#).*
- class [DotBase](#)  
*[Player](#) (= "ball who bounce") and "big dots" (the 2 dots on the top and the 2 dots on the bottom) inherit from this class. We handle seom references and intialize sprites.*
- class [GameManager](#)  
*In Charge to all the game management (game over, point, restart etc..) and in charge to show interstitial in the game. For monetizing this game with ads, everythign is already coded for you. You just need to get VERY SIMPLE ADS here: <http://u3d.as/oWD>*
- class [InputTouch](#)  
*In Charge of the inputs in the game.*
- class [Player](#)  
*Class in charge of the player. Attached to the [Player](#) GameObject (child of [GameManager](#)).*
- class [Utils](#)  
*Utility class.*

#### Enumerations

- enum [DotColor](#) { **Pink**, **Blue** }  
*Each game elements can be BLUE or PINK (2 colors).*
- enum [DotPos](#) { **Up**, **Down** }  
*The big dots are in the top (= DotPos.Up) or in the bottom (= DotPos.Down).*
- enum [TouchDirection](#) { **none**, **left**, **right** }  
*Touch direction: left or right.*

### 4.2.1 Enumeration Type Documentation

#### 4.2.1.1 enum **AppAdvisory.SpringPong.DotColor** [strong]

Each game elements can be BLUE or PINK (2 colors).

#### 4.2.1.2 enum **AppAdvisory.SpringPong.DotPos** [strong]

The big dots are in the top (= DotPos.Up) or in the bottom (= DotPos.Down).

#### 4.2.1.3 enum **AppAdvisory.SpringPong.TouchDirection** [strong]

Touch direction: left or right.

## Chapter 5

# Class Documentation

### 5.1 AppAdvisory.SpringPong.Dot Class Reference

Attached to the 4 big dots in the game. We just change the name of the dots by convenience. And get a reference to the [GameManager](#).

Inheritance diagram for AppAdvisory.SpringPong.Dot:

#### Public Member Functions

- override void [Awake](#) ()  
*Some initializations.*

#### Public Attributes

- [DotPos dotPos](#)  
*The DotPos*

#### 5.1.1 Detailed Description

Attached to the 4 big dots in the game. We just change the name of the dots by convenience. And get a reference to the [GameManager](#).

#### 5.1.2 Member Function Documentation

##### 5.1.2.1 override void AppAdvisory.SpringPong.Dot.Awake ( ) [inline],[virtual]

Some initializations.

Reimplemented from [AppAdvisory.SpringPong.DotBase](#).

### 5.1.3 Member Data Documentation

#### 5.1.3.1 DotPos AppAdvisory.SpringPong.Dot.dotPos

The DotPos

The documentation for this class was generated from the following file:

- /Volumes/LaCie/Dropbox/Anthony/\_\_\_AppAdvisory/PinkPong/Assets/\_SpringPong/Scripts/Dot.cs

## 5.2 AppAdvisory.SpringPong.DotBase Class Reference

[Player](#) (= "ball who bounce") and "big dots" (the 2 dots on the top and the 2 dots on the bottom) inherit from this class. We handle seom references and intialize sprites.

Inheritance diagram for AppAdvisory.SpringPong.DotBase:

### Public Member Functions

- virtual void [Awake](#) ()  
*Some initializations.*
- void [SetColor](#) ([DotColor](#) c)  
*Set the color of the SpriteRenderer.*

### Public Attributes

- [DotColor](#) color  
*The dot color: Pink or Blue. Please refer to DotColor.*
- [GameManager](#) gm  
*Reference to the GameManager.*
- [SpriteRenderer](#) sr  
*Reference to the SpriteRenderer.*

#### 5.2.1 Detailed Description

[Player](#) (= "ball who bounce") and "big dots" (the 2 dots on the top and the 2 dots on the bottom) inherit from this class. We handle seom references and intialize sprites.

### 5.2.2 Member Function Documentation

#### 5.2.2.1 virtual void AppAdvisory.SpringPong.DotBase.Awake ( ) [inline],[virtual]

Some initializations.

Reimplemented in [AppAdvisory.SpringPong.Player](#), and [AppAdvisory.SpringPong.Dot](#).

### 5.2.2.2 void AppAdvisory.SpringPong.DotBase.SetColor ( DotColor c ) [inline]

Set the color of the SpriteRenderer.

## 5.2.3 Member Data Documentation

### 5.2.3.1 DotColor AppAdvisory.SpringPong.DotBase.color

The dot color: Pink or Blue. Please refer to DotColor.

### 5.2.3.2 GameManager AppAdvisory.SpringPong.DotBase.gm

Reference to the [GameManager](#).

### 5.2.3.3 SpriteRenderer AppAdvisory.SpringPong.DotBase.sr

Reference to the SpriteRenderer.

The documentation for this class was generated from the following file:

- /Volumes/LaCie/Dropbox/Anthony/\_\_\_AppAdvisory/PinkPong/Assets/\_SpringPong/Scripts/DotBase.cs

## 5.3 AppAdvisory.SpringPong.GameManager Class Reference

In Charge to all the game management (game over, point, restart etc..) and in charge to show interstitial in the game. For monetizing this game with ads, everything is already coded for you. You just need to get VERY SIMPLE ADS here: <http://u3d.as/oWD>

Inheritance diagram for AppAdvisory.SpringPong.GameManager:

### Public Member Functions

- void [DoFadeIn](#) ()  
*Fade in the alpha of the in game elements: the 4 big dots, and the player ball.*
- void [DoFadeIn](#) (Action isCompleted)  
*Fade in the alpha of the in game elements: the 4 big dots, and the player ball.*
- void [DoFadeOut](#) ()  
*Fade out the alpha of the in game elements: the 4 big dots, and the player ball.*
- void [DoFadeOut](#) (Action isCompleted)  
*Fade out the alpha of the in game elements: the 4 big dots, and the player ball.*
- void [DOStart](#) ()  
*Method called by the UIController (have a look to the UIController GameObject editor, in the "On UI Anim Out End".*
- void [ShowAds](#) ()  
*Show interstitial ads. For monetizing this game with ads, everything is already coded for you. You just need to get VERY SIMPLE ADS here: <http://u3d.as/oWD>*

## Public Attributes

- string `nameOfTheGame` = "SPRING PONG"  
*The name of the game. Change it to change the title text.*
- string `VerySimpleAdsURL` = "http://u3d.as/oWD"  
*If you want to monetize this game, get VERY SIMPLE ADS at this URL: <http://u3d.as/oWD>*
- int `numberOfPlayToShowInterstitial` = 10  
*Number of "play" to show an interstitial. If you want to monetize this game, get VERY SIMPLE ADS at this URL: <http://u3d.as/oWD>*
- Transform `player`  
*Reference to the player (ie. the the centered ball).*
- Color `colorPink`  
*The pink color, change it to change the color.*
- Color `colorBlue`  
*The blue color, change it to change the color.*
- float `timeToMoveFromTopToBottom` = 0.6f  
*Speed of the ball (= `Player`) to make a complete move. Change it to change the speed.*
- Transform `dotUpPink`  
*Reference to the big dot on the top, pink.*
- Transform `dotUpBlue`  
*Reference to the big dot on the top, blue.*
- Transform `dotDownPink`  
*Reference to the big dot on the bottom, pink.*
- Transform `dotDownBlue`  
*Reference to the big dot on the bottom, blue.*
- Text `textTitle`  
*Reference to the text title.*
- Text `textScore`  
*Reference to the text score displayed in the center of the screen during the game.*
- AudioClip[] `pocs`  
*References to all the audioclips use when the ball bounce on a big dot. Change it , add some... to customize it.*
- AudioClip `lose`  
*Reference to the audioclip play when he player loses.*

## Properties

- DotColor `currentColor` [get]  
*DotColor of `Player`, ie. the ball who moves.*
- int `point` [get, set]  
*The point in the current game.*

## Private Member Functions

- void `Awake` ()  
*Some initializations.*
- void `StartTheUI` ()  
*At Start, we set the UI.*
- void `SetInGameElementsActive` (bool setActive)  
*Activate or deactivate in game elements: the 4 big dots, and the player ball.*
- void `OnTouched` (TouchDirection td)  
*Method called when we touch the screen (or click on desktop).*

- void `DOMoveDots ()`  
*Move the 4 big dots when the player touches the screen.*
- void `DOAlphaDots (float a)`  
*Change the alpha of the in game elements: the 4 big dots, and the player ball.*
- void `DOMovePlayer ()`  
*Move the player, ie. the bounce between top and bottom, and bottom and top.*
- void `DOGameOver ()`  
*Method called when the player loses. We will fade out all the in game elements(the 4 big dots, and the player ball) and restart the scene.*
- void `PlaySoundPoc ()`  
*Play a "poc" sound to display when the player ball bounce on a big dot.*
- void `PlaySoundLose ()`  
*Play the GameOver sound.*

### Private Attributes

- float `timeToMoveDotsDivisor = 20f`  
*Speed of the big dots on the top and the bottom is equal to the timeToMoveFromTopToBottom divide by that. Change it to change the speed of the big dots move.*
- `SpriteRenderer _dotUpPinkSR`  
*Reference to the SpriteRenderer of the big dot on the top, pink.*
- `SpriteRenderer _dotUpBlueSR`  
*Reference to the SpriteRenderer of the big dot on the top, blue.*
- `SpriteRenderer _dotDownPinkSR`  
*Reference to the SpriteRenderer of the big dot on the bottom, pink.*
- `SpriteRenderer _dotDownBlueSR`  
*Reference to the SpriteRenderer of the big dot on the bottom, blue.*
- `SpriteRenderer _playerSR`  
*Reference to the SpriteRenderer of the *Player*.*
- bool `isStarted = false`  
*True if the game is started. Used to block some method if the game is not started.*
- bool `isGameOver = false`  
*True if the game is Game Over. Used to block some method after the player loses.*
- float `decal = 0.45f`  
*We move the ball with a tweener, from the top to the bottom, and bottom from top. We place the big dots with the same top position and bottom position of the ball. But we don't want to have the ball go inside the big dots. So we decal the position with this value.*
- `DotColor currentColorUp = DotColor.Blue`  
*DotColor of the the top position, blue by default at start*
- `DotColor currentColorDown = DotColor.Pink`  
*DotColor of the bottom position, pink by default at start*
- int `_point = 0`  
*The point in the current game.*
- `System.Random rand = new System.Random()`  
*"Real" random use to select the "poc" sound to display when the player ball bounce on a big dot.*

#### 5.3.1 Detailed Description

In Charge to all the game management (game over, point, restart etc..) and in charge to show interstitial in the game. For monetizing this game with ads, everythign is already coded for you. You just need to get VERY SIMPLE ADS here: <http://u3d.as/oWD>

### 5.3.2 Member Function Documentation

5.3.2.1 `void AppAdvisory.SpringPong.GameManager.Awake ( ) [inline], [private]`

Some initializations.

5.3.2.2 `void AppAdvisory.SpringPong.GameManager.DOAlphaDots ( float a ) [inline], [private]`

Change the alpha of the in game elements: the 4 big dots, and the player ball.

5.3.2.3 `void AppAdvisory.SpringPong.GameManager.DoFadeIn ( ) [inline]`

Fade in the alpha of the in game elements: the 4 big dots, and the player ball.

5.3.2.4 `void AppAdvisory.SpringPong.GameManager.DoFadeIn ( Action isCompleted ) [inline]`

Fade in the alpha of the in game elements: the 4 big dots, and the player ball.

5.3.2.5 `void AppAdvisory.SpringPong.GameManager.DoFadeOut ( ) [inline]`

Fade out the alpha of the in game elements: the 4 big dots, and the player ball.

5.3.2.6 `void AppAdvisory.SpringPong.GameManager.DoFadeOut ( Action isCompleted ) [inline]`

Fade out the alpha of the in game elements: the 4 big dots, and the player ball.

5.3.2.7 `void AppAdvisory.SpringPong.GameManager.DOGameOver ( ) [inline], [private]`

Method called when the player loses. We will fade out all the in game elements(the 4 big dots, and the player ball) and restart the scene.

5.3.2.8 `void AppAdvisory.SpringPong.GameManager.DOMoveDots ( ) [inline], [private]`

Move the 4 big dots when the player touches the screen.

5.3.2.9 `void AppAdvisory.SpringPong.GameManager.DOMovePlayer ( ) [inline], [private]`

Move the player, ie. the bounce between top and bottom, and bottom and top.

5.3.2.10 `void AppAdvisory.SpringPong.GameManager.DOSTart ( ) [inline]`

Method called by the UIController (have a look to the UIController GameObject editor, in the "On UI Anim Out End".

5.3.2.11 `void AppAdvisory.SpringPong.GameManager.OnTouched ( TouchDirection td ) [inline], [private]`

Method called when we touch the screen (or click on desktop).

5.3.2.12 `void AppAdvisory.SpringPong.GameManager.PlaySoundLose ( ) [inline], [private]`

Play the GameOver sound.

**5.3.2.13** void AppAdvisory.SpringPong.GameManager.PlaySoundPoc ( ) [inline],[private]

Play a "poc" sound to display when the player ball bounce on a big dot.

**5.3.2.14** void AppAdvisory.SpringPong.GameManager.SetInGameElementsActive ( bool *setActive* ) [inline],[private]

Activate or deactivate in game elements: the 4 big dots, and the player ball.

**5.3.2.15** void AppAdvisory.SpringPong.GameManager.ShowAds ( ) [inline]

Show interstitial ads. For monetizing this game with ads, everything is already coded for you. You just need to get VERY SIMPLE ADS here: <http://u3d.as/oWD>

**5.3.2.16** void AppAdvisory.SpringPong.GameManager.StartTheUI ( ) [inline],[private]

At Start, we set the UI.

### 5.3.3 Member Data Documentation

**5.3.3.1** SpriteRenderer AppAdvisory.SpringPong.GameManager.\_dotDownBlueSR [private]

Reference to the SpriteRenderer of the big dot on the top, blue.

**5.3.3.2** SpriteRenderer AppAdvisory.SpringPong.GameManager.\_dotDownPinkSR [private]

Reference to the SpriteRenderer of the big dot on the bottom, pink.

**5.3.3.3** SpriteRenderer AppAdvisory.SpringPong.GameManager.\_dotUpBlueSR [private]

Reference to the SpriteRenderer of the big dot on the top, blue.

**5.3.3.4** SpriteRenderer AppAdvisory.SpringPong.GameManager.\_dotUpPinkSR [private]

Reference to the SpriteRenderer of the big dot on the top, pink.

**5.3.3.5** SpriteRenderer AppAdvisory.SpringPong.GameManager.\_playerSR [private]

Reference to the SpriteRenderer of the [Player](#).

**5.3.3.6** int AppAdvisory.SpringPong.GameManager.\_point = 0 [private]

The point in the current game.

**5.3.3.7** Color AppAdvisory.SpringPong.GameManager.colorBlue

The blue color, change it to change the color.

#### 5.3.3.8 Color AppAdvisory.SpringPong.GameManager.colorPink

The pink color, change it to change the color.

#### 5.3.3.9 DotColor AppAdvisory.SpringPong.GameManager.currentColorDown = DotColor.Pink [private]

DotColor of the bottom position, pink by default at start

#### 5.3.3.10 DotColor AppAdvisory.SpringPong.GameManager.currentColorUp = DotColor.Blue [private]

DotColor of the the top position, blue by default at start

#### 5.3.3.11 float AppAdvisory.SpringPong.GameManager.decal = 0.45f [private]

We move the ball with a tweener, from the top to the bottom, and bottom from top. We place the big dots with the same top position and bottom position of the ball. But we don't want to have the ball go inside the big dots. So we decal the position with this value.

#### 5.3.3.12 Transform AppAdvisory.SpringPong.GameManager.dotDownBlue

Reference to the big dot on the bottom, blue.

#### 5.3.3.13 Transform AppAdvisory.SpringPong.GameManager.dotDownPink

Reference to the big dot on the bottom, pink.

#### 5.3.3.14 Transform AppAdvisory.SpringPong.GameManager.dotUpBlue

Reference to the big dot on the top, blue.

#### 5.3.3.15 Transform AppAdvisory.SpringPong.GameManager.dotUpPink

Reference to the big dot on the top, pink.

#### 5.3.3.16 bool AppAdvisory.SpringPong.GameManager.isGameOver = false [private]

True if the game is Game Over. Used to block some method after the player loses.

#### 5.3.3.17 bool AppAdvisory.SpringPong.GameManager.isStarted = false [private]

True if the game is started. Used to block some method if the game is not started.

#### 5.3.3.18 AudioClip AppAdvisory.SpringPong.GameManager.lose

Reference to the audioclip play when he player loses.

#### 5.3.3.19 string AppAdvisory.SpringPong.GameManager.nameOfTheGame = "SPRING PONG"

The name of the game. Change it to change the title text.

5.3.3.20 `int AppAdvisory.SpringPong.GameManager.numberOfPlayToShowInterstitial = 10`

Number of "play" to show an interstitial. If you want to monetize this game, get VERY SIMPLE ADS at this URL: <http://u3d.as/oWD>

5.3.3.21 `Transform AppAdvisory.SpringPong.GameManager.player`

Reference to the player (ie. the the centered ball).

5.3.3.22 `AudioClip [] AppAdvisory.SpringPong.GameManager.pocs`

References to all the audioclips use when the ball bounce on a big dot. Change it , add some... to customize it.

5.3.3.23 `System.Random AppAdvisory.SpringPong.GameManager.rand = new System.Random()` `[private]`

"Real" random use to select the "poc" sound to display when the player ball bounce on a big dot.

5.3.3.24 `Text AppAdvisory.SpringPong.GameManager.textScore`

Reference to the text score displayed in the center of the screen during the game.

5.3.3.25 `Text AppAdvisory.SpringPong.GameManager.textTitle`

Reference to the text title.

5.3.3.26 `float AppAdvisory.SpringPong.GameManager.timeToMoveDotsDivisor = 20f` `[private]`

Speed of the big dots on the top and the bottom is equal to the `timeToMoveFromTopToBottom` divide by that. Change it to change the speed of the big dots move.

5.3.3.27 `float AppAdvisory.SpringPong.GameManager.timeToMoveFromTopToBottom = 0.6f`

Speed of the ball (= `Player`) to make a complete move. Change it to change the speed.

5.3.3.28 `string AppAdvisory.SpringPong.GameManager.VerySimpleAdsURL = "http://u3d.as/oWD"`

If you want to monetize this game, get VERY SIMPLE ADS at this URL: <http://u3d.as/oWD>

## 5.3.4 Property Documentation

5.3.4.1 `DotColor AppAdvisory.SpringPong.GameManager.currentColor` `[get], [private]`

DotColor of `Player`, ie. the ball who moves.

5.3.4.2 `int AppAdvisory.SpringPong.GameManager.point` `[get], [set], [private]`

The point in the current game.

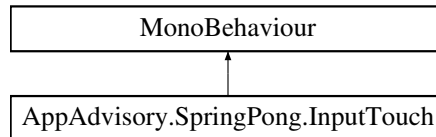

The documentation for this class was generated from the following file:

- `/Volumes/LaCie/Dropbox/Anthony/___AppAdvisory/PinkPong/Assets/_SpringPong/Scritps/GameManager.cs`

## 5.4 AppAdvisory.SpringPong.InputTouch Class Reference

In Charge of the inputs in the game.

Inheritance diagram for AppAdvisory.SpringPong.InputTouch:

### Public Member Functions

- delegate void **OnTouch** ([TouchDirection](#) td)

### Events

- static OnTouch **OnTouched**

### Private Member Functions

- void **Update** ()

#### 5.4.1 Detailed Description

In Charge of the inputs in the game.

The documentation for this class was generated from the following file:

- /Volumes/LaCie/Dropbox/Anthony/\_\_\_AppAdvisory/PinkPong/Assets/\_SpringPong/Scripts/InputTouch.cs

## 5.5 AppAdvisory.SpringPong.Player Class Reference

Class in charge of the player. Attached to the [Player](#) GameObject (child of [GameManager](#)).

Inheritance diagram for AppAdvisory.SpringPong.Player:

### Public Member Functions

- override void [Awake](#) ()  
*Some initializations.*
- void [RandomColor](#) ()  
*Get a random color for the ball (Pink or Blue, please refer to DotColor). Called agter each bounce.*

## Private Attributes

- System.Random [rand](#) = new System.Random()  
*"Real" random use to select the "poc" sound to display when the player ball bounce on a big dot.*

## Additional Inherited Members

### 5.5.1 Detailed Description

Class in charge of the player. Attached to the [Player](#) GameObject (child of [GameManager](#)).

### 5.5.2 Member Function Documentation

5.5.2.1 `override void AppAdvisory.SpringPong.Player.Awake ( ) [inline],[virtual]`

Some initializations.

Reimplemented from [AppAdvisory.SpringPong.DotBase](#).

5.5.2.2 `void AppAdvisory.SpringPong.Player.RandomColor ( ) [inline]`

Get a random color for the ball (Pink or Blue, please refer to DotColor). Called agter each bounce.

### 5.5.3 Member Data Documentation

5.5.3.1 `System.Random AppAdvisory.SpringPong.Player.rand = new System.Random() [private]`

"Real" random use to select the "poc" sound to display when the player ball bounce on a big dot.

The documentation for this class was generated from the following file:

- /Volumes/LaCie/Dropbox/Anthony/\_\_\_AppAdvisory/PinkPong/Assets/\_SpringPong/Scritps/Player.cs

## 5.6 AppAdvisory.SpringPong.Utils Class Reference

Utility class.

### Static Public Member Functions

- static bool [HaveSameColor](#) (this [DotBase](#) dBase, [DotBase](#) other)  
*Compare colors.*
- static bool [HaveSameColor](#) (this Transform dBase, Transform other)  
*Compare colors.*
- static bool [HaveSameColor](#) (this [DotColor](#) c, Transform other)  
*Compare colors.*
- static bool [SetBest](#) (int lastScore)  
*Set the best score.*
- static int [GetBest](#) ()  
*Get the best score.*
- static void [SetLast](#) (int lastScore)  
*Set the last score.*

- static int [GetLast](#) ()  
*Get the last score.*
- static void [SetAlpha](#) (this SpriteRenderer sr, float a)  
*Set alpha of Spriterenderer element.*
- static void [SetAlpha](#) (this Image im, float a)  
*Set alpha of UI Image element.*
- static void [SetAlpha](#) (this Text t, float a)  
*Set alpha of UI Text element.*
- static void [ReloadLevel](#) ()  
*Clean the memory and reload the scene*
- static void [CleanMemory](#) ()  
*Clean the memory*

### 5.6.1 Detailed Description

Utility class.

### 5.6.2 Member Function Documentation

5.6.2.1 static void AppAdvisory.SpringPong.Utils.CleanMemory ( ) [inline],[static]

Clean the memory

5.6.2.2 static int AppAdvisory.SpringPong.Utils.GetBest ( ) [inline],[static]

Get the best score.

5.6.2.3 static int AppAdvisory.SpringPong.Utils.GetLast ( ) [inline],[static]

Get the last score.

5.6.2.4 static bool AppAdvisory.SpringPong.Utils.HaveSameColor ( this DotBase *dBase*, DotBase *other* ) [inline],[static]

Compare colors.

5.6.2.5 static bool AppAdvisory.SpringPong.Utils.HaveSameColor ( this Transform *dBase*, Transform *other* ) [inline],[static]

Compare colors.

5.6.2.6 static bool AppAdvisory.SpringPong.Utils.HaveSameColor ( this DotColor *c*, Transform *other* ) [inline],[static]

Compare colors.

5.6.2.7 static void AppAdvisory.SpringPong.Utils.ReloadLevel ( ) [inline],[static]

Clean the memory and reload the scene

5.6.2.8 `static void AppAdvisory.SpringPong.Utils.SetAlpha ( this SpriteRenderer sr, float a ) [inline],[static]`

Set alpha of Spriterenderer element.

5.6.2.9 `static void AppAdvisory.SpringPong.Utils.SetAlpha ( this Image im, float a ) [inline],[static]`

Set alpha of UI Image element.

5.6.2.10 `static void AppAdvisory.SpringPong.Utils.SetAlpha ( this Text t, float a ) [inline],[static]`

Set alpha of UI Text element.

5.6.2.11 `static bool AppAdvisory.SpringPong.Utils.SetBest ( int lastScore ) [inline],[static]`

Set the best score.

5.6.2.12 `static void AppAdvisory.SpringPong.Utils.SetLast ( int lastScore ) [inline],[static]`

Set the last score.

The documentation for this class was generated from the following file:

- /Volumes/LaCie/Dropbox/Anthony/\_\_\_AppAdvisory/PinkPong/Assets/\_SpringPong/Scripts/Utils.cs
